

Data Sheet Issue 09/2012

BYK-301

Silicone surface additive for solvent-borne and aqueous systems with a medium reduction of surface tension.

Product Data

Composition

Solution of a polyether-modified polydimethylsiloxane

Typical Properties

The values indicated in this data sheet describe typical properties and do not constitute specification limits.

Density (20 °C): 0.97 g/ml Non-volatile matter (10 min., 150 °C): 52 % Solvents: Butylglycol Flash point: 63 °C

Food Contact Legal Status

For the current food contact legal status, please contact our product safety department or visit www.byk.com for further information.

Special Note

Unlike so-called silicone oils, this additive is very user-friendly. However, before use, one should determine in test series whether foam is stabilized in certain systems and check the recoatability and crater development.
