

CERAMAT 241

Wax dispersion based on an oxidized HD polyethylene wax for solvent-borne systems to improve surface protection.

Product Data

Composition

Dispersion of an oxidized HD polyethylene wax

Typical Properties

The values indicated in this data sheet describe typical properties and do not constitute specification limits.

Non-volatile matter (60 min., 125 °C): 20 %
Carrier: Xylene/butyl acetate 1/1
Melting point (wax content): 135 °C
Particle size (Hegman): 25 µm
Viscosity (23 °C): 300 mPa·s

Food Contact Legal Status

For the current food contact legal status, please contact our product safety department or visit www.byk.com for further information.

Storage and Transportation

Temperature sensitive. To be stored and transported at a temperature below 35 °C. Mix well before use.

Applications

Special Note

The additive should preferably be post-added using a low shear rate. Mix well before use.

Special Features and Benefits

The additive improves the scratch resistance and the soft-feel effect. It also reduces settling in the container and has a matting effect. It may be used in solvent-borne furniture and parquet varnishes and industrial coatings.
